### Personal and Professional Values

- Trustworthiness**      Saying what I will do, doing what I say, saying what I mean, meaning what I say
- Fairness**              Honest and sincere, seeking to understand before being understood, putting myself in others' shoes. Recognising that being fair may not mean everyone receiving equally, rather that everyone receives what they deserve and need to succeed
- Excellence**            Caring more than others think is wise, risking more than others think is safe, dreaming more than others think is practical and expecting more than others think is possible
- Generosity**            Going the extra mile, without desire for reciprocation
- Courage**                Facing difficulty or fears and acting in accordance with what I believe is right and fair
- And also ...
- Creativity**             Having fun, thinking 'nothing' is impossible, collaborating with others
- Openness**             Open minded attitude, receptive to new ideas, striving to learn from ALL experiences, lifelong learning
